

Stephenson's Rocket

Facts About Stephenson's Rocket

- Built for the 1829 race to find the fastest locomotive.
- 15,000 went to watch the 2 locomotives race.
- George Stephenson was helped to build it by his son, Robert, and Henry Booth.
- The Rocket had a new design which helped it to go faster.
- The Rocket won the race and was chosen to travel the line between Liverpool and Manchester.
- It reached speeds of up to 24 miles an hour.
- The race was over 20 laps of the course.

The facts above are all true but are not in the best order and are a list, not a report.

Can you rearrange them to make them more interesting to read? Maybe you could make some of the sentences more interesting too.
